

Catalogue of refurbished rear axles for Peugeot Citroen Renault cars

Information about refurbishing:

- All of old axles are being dismantled with specialist tools. We check the condition of all parts, whether they could be regenerated or replaced (we also check if the rear axle comes from the crashed car or not)
- Axle shaft replacement – In cold fit technology. This technology gives the best durability without risk of damage. Axle shafts hardness is 60HRC.
- Bearings replacement. We use SNR bearings (SNR is producer of the original bearings for Peugeot/Citroen).
- Mortise and stabilizer fins check. We regenerate damaged wishbones on professional CNC machine.
- All rusted and damaged stabilizer fins are being replaced.
- We check and replace (if needed) mounting pads - bushes (for 206/Partner/Berlingo).
- Axles are being also Sand-blasted and painted..

Only this way of refurbishing gives you the Best durability. We give 2 years warranty for all types of axles.
